Professional Summary

Flutter developer and Computer Engineering student with a proven ability to ship production ready, AI-powered mobile applications. Built and launched **Meld**: a fusion recipe app spanning 106 world cuisines, 11 dietary filters, and 11 languages, currently live on the **App Store**; independently, from concept to deployment. Experienced with Gemini API, Supabase, Firebase, and RevenueCat. Completed an **Erasmus+** exchange at Karlsruhe University of Applied Sciences. **Awarded 1st place** at IKUANTS Glow Up Ideathon among 15 teams. Looking to join a team where I can build real products, grow fast, and contribute from day one. **Not just building features; building products that reach real users.**

Projects

Meld

AI-Powered Fusion Culinary App | Flutter, Supabase

- Engineered a fusion recipe engine spanning **106 world cuisines**, generating unique dishes across **4 categories** (appetizer, soup, main, dessert) via Gemini API and advanced prompt engineering designed to minimise recipe repetition across sessions.
- Implemented **11 dietary preference filters** covering lifestyle, religious, and cultural restrictions (Vegetarian, Halal, Kosher, Jain, Orthodox Fasting, and more), ensuring personalised recipe generation with zero compromise on user constraints.
- Integrated **RevenueCat** for cross-platform subscription and payment management, enabling a scalable monetisation layer within the Flutter app.
- Shipped the app in **11 languages** through full localisation integration, targeting a global user base from day one.

Dreamie

AI-Powered Wellness & Dream Analysis Mobile App | Flutter, Firebase

- Engineered a cross-platform mobile application using Flutter and Firebase, focusing on personalized AI-driven dream interpretation and sleep wellness.
- Integrated Gemini API with advanced prompt engineering to provide multi-perspective dream analysis (e.g., Psychological, Spiritual, Islamic), delivering tailored user experiences.
- Architected a persistent data model in Cloud Firestore for tracking historical dream logs and personalized user insights.

SMMM Asistanım

Financial Consultant Assistant App | Flutter

- Managed a database of **100+ client records** with a secure schema designed for sensitive financial data, backed by Firebase Authentication.
- Automated web-based data entry workflows using Selenium WebDriver, reducing manual input time by approximately **70%** for daily consultancy operations.
- Developed a Windows desktop application in Flutter to centralise client management, document tracking, and data synchronisation for a financial consultancy firm.

Visitalia

Travel & Tourism Web App | ASP.NET MVC

- Collaborated in a team of **4 developers** to architect a full-stack travel application, utilizing Git for version control and collaborative code reviews.
- Implemented core backend logic using ASP.NET MVC and C#, ensuring seamless integration between individual modules and the centralized MSSQL database.
- Adhered to **Agile principles** during the development lifecycle, participating in task estimation and sprint-based deliveries to meet project deadlines.

Skills

Technical Skills

- Programming Languages: C, C++, C#, Dart, HTML, CSS, SQL
- Frameworks & Tools: Flutter, ASP.NET MVC, MSSQL, Git, Figma, Supabase, Firebase, Selenium, Gemini API

Soft Skills

- Agile & Scrum Practices
- Project Management
- Problem Solving & Analytical Thinking
- Team Collaboration & Communication

Awards

IKUANTS Glow Up Ideathon

01 Nov 2025

1st Place

- Awarded 1st place among 15 teams for developing a sustainable digital platform aimed at solving the student housing crisis.
- Collaborated with a cross-functional team to conceptualize, validate, and pitch a high impact business model within a limited timeframe.

Education

Istanbul Kültür University

Sep 2022 – Jun 2026 | Istanbul, Türkiye

Bachelor of Engineering in Computer Engineering

Karlsruhe University of Applied Sciences

Mar 2025 – Aug 2025

Erasmus+ Study Programme

Karlsruhe, Germany

Dede Korkut Anatolian High School

Sep 2018 – Jun 2022 | Istanbul, Türkiye

High School

Work Experience

Koca Panda Yazılım

Aug 2024 – Sep 2024 | Remote

Remote Freelance Software Developer

- Developed and integrated 3 core modules for a Flutter based mobile application, specializing in user profile management.
- Maintained high code quality by adhering to Clean Code principles and utilizing Git for efficient version control and collaborative development.

Bedir SMMM (Financial Consulting)

Jul 2023 – Sep 2023 | Istanbul, Türkiye

Volunteer IT Support & Operations

- Managed hardware maintenance and technical troubleshooting for office infrastructure.
- Gained hands-on experience with financial consultancy workflows, which later informed the development of specialized software solutions for the industry.

Languages

Turkish: Native, **English:** C1, **German:** A2.2
